A PhD in Education prepares scholars to address the critical problems we face in education, teaching and learning.

Doctoral students at UD work alongside engaged faculty to develop research skills that are applicable to a broad array of careers in academia, business, government and nonprofit organizations.

Prior to completion of the degree, students receive broad-based analytic training--routinely publishing in academic journals and presenting papers at national and international conferences.

**PhD in Education students specialize in 1 of 6 areas**

- Evaluation, Measurement and Statistics
- Learning Sciences
- Literacy Development and Learning Problems
- Mathematics Education
- School Psychology
- Sociocultural and Community-Based Approaches to Education

Typically, UD’s PhD students are able to complete their degree within 4-5 years of full-time study.

Over the past 10 years, all full-time PhD students in Education have received financial assistance through assistantships or tuition scholarships.

**Mathematics Education**

Students in this specialization focus on critically examining issues of teaching and learning mathematics. A distinctive feature is the integration of teaching and research experiences. Opportunities include conducting research studies on a variety of issues related to teaching, learning, and teacher education; teaching sections of mathematics content and methods courses for prospective K-8 teachers; and participating in course instructor groups to study and revise components of these courses.

**Faculty:**

- Dr. Dawn Berk
- Dr. Jina Cai
- Dr. Michelle Cirillo
- Dr. Alfinio Flores
- Dr. Brad Glass
- Dr. James Hiebert
- Dr. Charles Hohensee
- Dr. Amanda Jansen
- Dr. Jon Manon
- Dr. Anne Morris
- Dr. Jungeun Park
