Make a Difference through Significant Research
Work with Acclaimed and Productive Faculty
Become a Leader in Education

A PhD in Education prepares scholars to address the critical problems we face in education, teaching and learning.

Doctoral students at UD work alongside engaged faculty to develop research skills that are applicable to a broad array of careers in academia, business, government and nonprofit organizations.

Prior to completion of the degree, students receive broad-based analytic training—routinely publishing in academic journals and presenting papers at national and international conferences.

PhD in Education students specialize in 1 of 6 areas

- Evaluation, Measurement and Statistics
- Learning Sciences
- Literacy Development and Learning Problems
- Mathematics Education
- School Psychology
- Sociocultural and Community-Based Approaches to Education

Typically, UD’s PhD students are able to complete their degree within 4-5 years of full-time study.

Over the past 10 years, all full-time PhD students in Education have received financial assistance through assistantships or tuition scholarships.

Sociocultural and Community-Based Approaches to Education

Students in this specialization focus on the theoretical and conceptual principles related to the study of equity and the science of diversity. Students develop expertise on contextual and cultural foundations of education and on community-centered approaches to educational issues that are responsive to the needs of local communities and promote equitable educational outcomes for students. Particular attention is given to populations and communities historically underserved by schooling institutions.

Faculty:

- Dr. Deborah Bieler
- Dr. Laura Eisenman
- Dr. Robert Hampel
- Dr. Eugene Matusov
- Dr. Chrystalla Mouza
- Dr. Lynnette Overby
- Dr. Yasser Payne
- Dr. Rosalie Rolón-Dow
- Dr. Elizabeth Soslau
