Methods Clinical Educator Teacher Expectations

UD Methods clinical educators are expected to...

• Participate in an orientation meeting with the UD field supervisor who will work with you at your school. This meeting will be held before or during the first week of the practicum so that our program, assignments, and expectations can be explained.

• Meet and communicate with your student(s) to clarify assignments, share expectations that you have, and to assist with topic/lesson selections.

• Provide assistance to the method student(s) in planning and implementing lessons.

• Provide constructive feedback to the students during the field experience. Clinical educators maintain responsibility for their classrooms. Methods students are NOT to be left in sole charge of a class for extended periods of time.

• Communicate concerns or questions related to the methods student(s) and/or experience to either your UD field supervisor.

• Refrain from involvement with any other pre-service teacher program on the days that the methods students are scheduled in your classroom.

• Complete a dispositions form and a final evaluation form for EACH methods student.
