School of Education
Spring 2016 Colloquium Series

This colloquium series will begin with two presentations on early STEM learning from the disciplinary perspective of the learning sciences and educational psychology. The series will then continue our Fall theme, “Writing Research: Where We Are and Where We Are Heading,” and foster conversations about the present state of writing research and productive paths for future work.

February 24
Kelly Mix
Professor of Educational Psychology
Michigan State University
Spatial Ability and Mathematics: Can Educators Leverage the Connection?

March 7
