

PhD in Education Mathematics Education

The Mathematics Education specialization within our exceptional PhD program in Education prepares graduates to address critical issues in mathematics education, teaching, and learning. Our alumni pursue jobs in high demand in Mathematics and Mathematics Education.

Doctoral students examine critical issues in mathematics teaching and learning within a program that integrates teaching and research opportunities. They conduct research on teaching, learning, and teacher education, teach sections of mathematics content and methods courses for prospective K-8 teachers, and participate in the continuous improvement of undergraduate courses.

Admission Requirements

- Master's degree in Mathematics, Mathematics Education, or related fields
- Bachelor's degree in Mathematics or Secondary Mathematics Education
- Strong mathematics background and teaching experience preferred, but alternate, relevant backgrounds considered.

Financial Support for All Students

- Full tuition scholarships
- Yearly stipends for teaching and research assistantships

Program Experiences

- Examine critical issues of mathematics teaching and learning across K-12 and undergraduate levels
- Complete your degree in four years
- Learn in a climate of collaboration and camaraderie. Learn about current students at: www.education.udel.edu/phd-student-directory/

Career Opportunities

- Faculty positions in research universities, teaching colleges, and teacher education programs
- Leadership positions in state departments of education and school districts
- Policy positions with governments and educational organizations
