

# Fall 2018

EDUC 387

## Practicum Week 1

- Examine the Technology found in your practicum classroom and complete a Technology Inventory

## Practicum Week 2

- During the third week of your practicum you will be responsible for conducting a technology-integrated lesson with a small group of students. Discuss your plan with your cooperating teacher. Even though you may not know exactly which lesson you will implement you still need to let your teacher know this is a requirement. You will need to work with at least 1-2 students for 15-30 minutes. Also emphasize you will need to use technology for the lesson and plan where you will be able to conduct it (e.g., classroom computers, technology lab, library, etc.). You may choose to implement a lesson you designed in this course (e.g., concept mapping, Web 2.0 tools etc.) or you may choose a lesson from your Methods courses, which can be enhanced through technology. For the purpose of this class, an overhead projector is not considered acceptable technology use.

## Practicum Week 3

- Technology Integrated Lesson Implementation & Reflection
