University of Delaware Professional Education Conceptual Framework

The Conceptual Framework for the MA TESL Program and all professional education programs at the University of Delaware is located at [http://www.ucte.udel.edu/wp-content/uploads/2012/01/Conceptual-Framework-2012.pdf](http://www.ucte.udel.edu/wp-content/uploads/2012/01/Conceptual-Framework-2012.pdf). With reflective practice as a guiding principle and with diverse learning communities as a context, the University of Delaware prepares candidates to adopt and integrate three critical professional roles: scholar, problem solver, and partner. UD-prepared educators function as:

- **Scholars**, who are grounded in the knowledge of their disciplines, in pedagogical content knowledge, in knowledge of best practices informed by state and national standards, and in theory and research concerning individuals, families, and communities.

- **Problem solvers**, who construct practical, effective approaches to professional challenges using a sound base of theory and research, and who help others construct their own ways of addressing challenges.

- **Partners**, who use a flexible array of well-developed skills to support the positive development of all learners, giving balanced attention to the emotional, social, physical and cognitive dimensions of students' lives.
