

EDUC 390-Classroom Management for Social and Emotional Learning

Field Experience Handbook

Fall 2023

Field Experience Assignment(s):

Mondays of Field Time and Field Week 1:

You and your partner will keep a reflection journal—recording down NOTICINGS and observations and reflective thinking of classroom management strategies/approaches used in your classroom and the role of social and emotional learning.

You should complete a practice video recording of a lesson!! Make sure video and audio quality is satisfactory. Make adjustments for Week 2 in the field.

Field Week 2: Implement CM plan with interactive modeling

Prior to this second full week in the experience, you will “add on” to one of your curriculum lesson-plans—inserting CM considerations/strategies that will be used PRIOR to teaching the lesson. You will also plan an interactive modeling activity to implement that will provide students with strategic modeling of a particular skill or behavior. During week 2, you will implement these plans, video record your lesson, and reflect on their effectiveness.
